

# **Zweites Koha-DACH-Hackfest**

**Tuesday, October 7, 2025 - Thursday, October 9, 2025**

**Gesellschaft für wissenschaftliche Datenverarbeitung mbH Göttingen**

## **Scientific Program**

## Thursday Oct 9th

Workshops on Thursday

### **Quality assessment of catalogue records**

In the session we will introduce QA Catalogue, a tool to measure quality aspects of library catalogues in MARC21, PICA or UNIMARC metadata schema. After a short presentation the participants could try the tool on their own data. If you would like to participate please bring your catalogue records - or at least a subset of it. In your notebook you should have Docker Engine installed. You can find installation guide here:  
<https://pkiraly.github.io/qa-catalogue/quick-start-guide.html#with-docker>
