

10th Anniversary Symposium

Friday, 15 November 2024
Max Planck Institute for
Biology of Ageing

9:20

Welcome by CGA

9:45

Dr. Susanna Tulli, class 2016 (Max Perutz Labs, Vienna)

Faa1 membrane binding drives positive feedback in autophagosome biogenesis.

10:15

Dr. Hans-Georg Sprenger, class 2014 (MPI for Biology of Ageing, Cologne)

Exercise as a platform to discover unknown molecular mechanisms controlling mitochondrial metabolism & ageing.

10:45

Dr. Sukru Anil Dogan, class 2009 (BILSAB, Bezmialem Vakif University, Istanbul)

Tissue-specific stress responses in mitochondrial (cardio)myopathies

11:15

Dr. Ana Carolina De Sousa Leote, class 2017 (Genentech Inc., San Francisco)

Insights into mechanisms of senescence from genetic perturbation screens

11:45-

12:45

Lunch break

12:45

Dr. Raymond Laboy Morales, class 2016 (Harvard Medical School, Boston)

Metabolic regulation of noncoding RNAs in lipotoxicity.

13:15

Dr. Merly Vogt, class 2009 (Helmholtz Center, Munich)

Metabolic programming of the nervous system: Conserved signals prime future generations for impaired health outcomes.

13:45

Dr. Colin Donohoe, class 2011 (Qiagen, Hilden)

There and back again. My path to a career in the biotech industry.

14:15

Dr. Magdalena Schilling, class 2015 (Institute for Drugs & Medical Devices, Bonn)

Life without pipettes: Being a biochemist at BfArM

14:45-

15:15

Coffee break

15:15-

16:45

Career panel discussion

Dr. Nils Hansmeier, class 2014; Dr. Meret Cepero Malo, class 2019; Dr. Lucie Stamm, class 2013;
Dr. Till Popkes van Oepen, class 2016; Dr. Joanna Stepek, class 2012; Dr. Moritz Horn, class 2010;
Merly Vogt, class of 2009; Colin Donohoe, class of 2011.

16:45

Networking break
